List of Original Dataset Attribute Names:	

Filtering

(did the dataholder exclude data from the original data set e.g. data of old years, in-accurate data etc.)

Explanation	

Geometry Transformations

(indicate if geometry was transformed to WGS84)

Explanation	

Spatial Accuracy

Explanation	

Confidence Score

Explanation	

Observation Date

Select from the original dataset from attribute name:	
or	
Manual Date selected for all the observation:	
Explanation	

Crop Type Mapping

Attribute Selected for crop label mapping:	
Original Dataset Attribute Value	**Worldcereal Crop Type Value**

Irrigation Status Mapping

(Only if attribute is selected this section will be filled)

Attribute Selected for irrigation statusl mapping:	
Original Dataset Attribute Value	**Worldcereal Irrigation Status**

End

Example: The original data set, known under DOI xxxx, included data of older years that we removed.

The text in the left cell could be written in the harmonization document and afterwards edited by the WorldCereal moderator

The text in the left cell could be written in the harmonization document and afterwards edited by the WorldCereal moderator

The text in the left cell could be written in the harmonization document and afterwards edited by the WorldCereal moderator

Example: Took 6 October as it is the centre of the crop calendar

Worldcereal Crop Type Description

Worldcereal Irrigation Description
